

2017 Georgia Tech High School Mathematics Competition
April 15
Team Results

The team score is computed from the free response and cipher scores. The scores are normalized to 100. The top 4 cipher scores on the team are added to 3 times the top 4 free response scores on the team, for a total possible score of 1600. To break any ties, we add to this the fractional average of all team members' individual scores. Team members' individual scores are computed as cipher plus 3 times free response out of 400.
